KITCHEN SCRUBBERS

“WE PROVIDE YOUR KITCHEN A BREATH OF FRESH AIR”

A Kitchen Scrubber is a smaller and relatively compact size of the Industrial Scrubber especially designed for food industry kitchens, where the volume of pollution is low and limited to particulate matter, oil, odour and mist.

“Ventech” Kitchen scrubbers are customized to scrub kitchen fumes efficiently.

PRINCIPLE OF SCRUBBING

The kitchen fumes are drawn from the kitchen hood through duct and enter the scrubber and flow horizontally. The fumes are scrubbed using opposed spray of high pressure mist created by especially designed nozzles. The water is re-circulated by a pump through sump strainer.

These kitchen scrubbers have SWSI / DWDI centrifugal fans (fan section) installed in the upstream end to draw fumes through the scrubber and letting out relatively clean air.

CAPACITY RANGE : Upto 50,000 CFM

COMPONENTS

- Casing : Single skin / Double Skin in GI construction.
- Blower: Centrifugal backward / forward curved blowers.
- Pump: Monobloc water re-circulating Pump complete with pipe/ pipe fittings including valves/stainers.
- Filters: Washable Aluminium / GI metallic filters.
- Spray headers: GI / PVC / SS Double opposed spray banks.
- Spray nozzles: Brass / PVC.
- Water tank: S.S fabricated / GI / FRP lined.
- Mist Eliminators: PVC / GI 4/6 bend mist eliminators.
- Intake Louvers: GI (to streamline air flow).
- The above scrubber internals can also be installed in the masonry housings with Centrifugal / Axial fans.
